The people behind PHIC

Why PHIC exists

- single industry wide voice
- information sharing and knowledge transfer
- facilitates collaboration
- focus on amplifying positive impacts from industry – social and economic
- share best practice on environment, marine management, dust and noise management and land-use planning
- reports on the economic value of Port Hedland to the local community, the state and the nation
- Promotes a positive Port Hedland

Our Members

Work for the common good of industry and the Port Hedland community

- Significant contributors to the Western Australia economy
- Provide direct and indirect jobs for the State and the Port Hedland community
- Provide security for people employed directly by operators and security
- Provide security and certainty for local businesses
- Positively work together to relieve constraints to maximise Port growth
- Collectively contribute to local and State Government through rates, royalties, taxes, social investment, training and development and infrastructure investment
- Contribute to the scientific understanding of the environment in Port Hedland including air quality, noise, and land and marine environments
- Contribute to the economic understanding of the value of industry to the local, state and national economies

Community Industry Forum

PHIC has established a Community Industry Forum (CIF). This quarterly forum has been designed to connect all parts of the broader Port Hedland community. It comprises representatives from industry, government, community groups, indigenous representatives and interested community members.

The purpose of the PHIC CIF is to ensure meaningful engagement and ensure two-way information sharing and promote open, constructive communication between all stakeholders and to work towards developing a shared vision for Port Hedland.

Our Environmental Programs

The **StateWide Array Surveillance Program** is a world-first in the use of molecular techniques by a collaborative marine biosecurity surveillance network.

Successful SWASP retrieval and shoreline survey undertaken in April, attended by PPA and BHP.

The State-Wide Array Surveillance Program Collaborative project between:

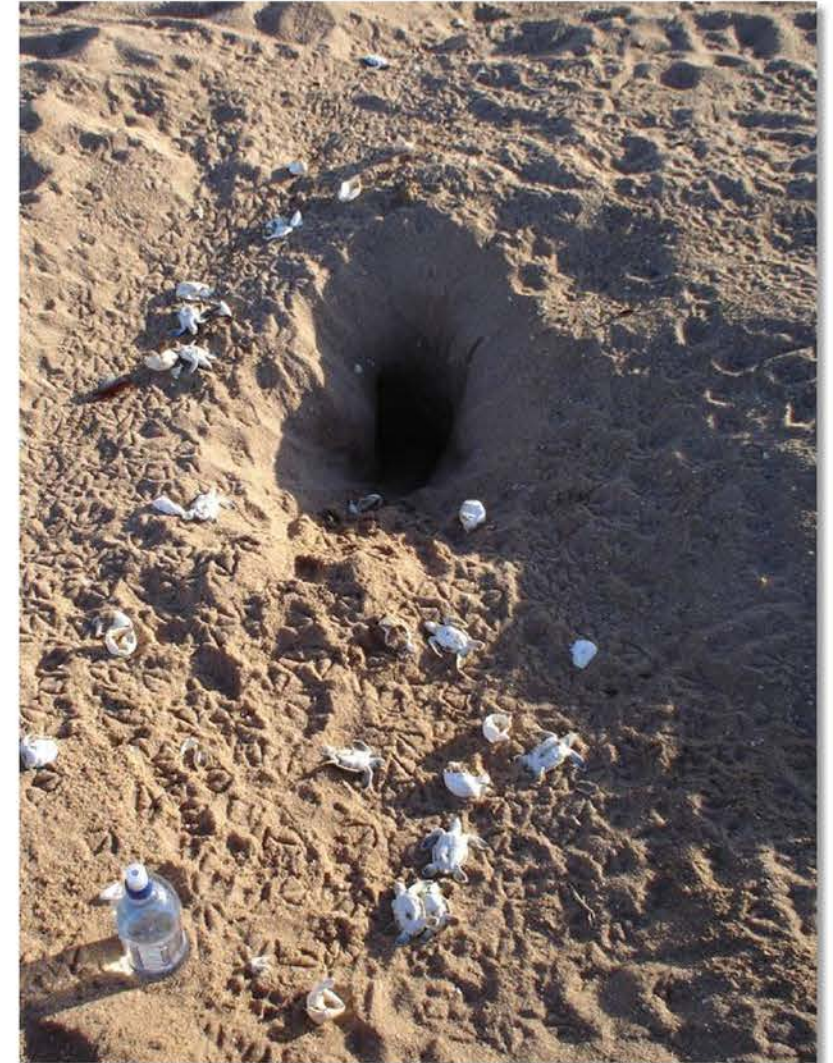

- Department of Primary Industries and Regional Development (DPIRD)
- Western Australian Port Authorities
- Industry

Our Environmental Programs

Vertebrate Pest Management Program

- PHIC members, ToPH, Care For Hedland and Dampier Salt now working together in the biannual program.
- Since there has been a coordinated approach there have been no fox disturbances at Pretty Pool Beach.
